SUMMARY

Full-stack developer with 4 years of experience building web and mobile products end to end. Currently build and run the order-to-delivery systems for a cross-border retail business: Amazon SP-API order sync across multiple seller accounts, automated purchasing and courier booking through background workers and schedulers, live shipment tracking, and a multi-warehouse (US/UAE) storefront with Razorpay payments. Previously spent 2.5+ years on React Native, including fitness apps for clients such as AT&T and SportzVillage.

TECHNICAL SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), Redux, HTML5, CSS3
Mobile: React Native, ML Kit, Strava & Google Fit APIs, Android Studio, Xcode
Backend: Node.js, Nest.js, Express.js, Fastify, REST APIs, background workers, schedulers & cron jobs
Databases: PostgreSQL, MySQL, MongoDB Firebase / Firestore
Integrations & Cloud: Amazon SP-API,Amazon SQS, AWS S3, Razorpay, Blue Dart & XpressBees APIs, PlayFab
Tools & Practices: Git, GitHub, Postman, VPS deployment, Google Search Console, Google Analytics, Agile / Scrum

EXPERIENCE

Senior Software Developer — Growve Retail and Management Services Pvt. Ltd. *Sep 2025 – Present*
Stack: Next.js, Node.js, Express.js, Fastify, PostgreSQL, Firebase / Firestore

- **Order automation CRM –** Built the internal CRM that syncs orders from 3 Amazon seller accounts via SP-API (400+orders/day). Background workers and schedulers run the full flow automatically (purchase orders, procurement and Blue Dart/XpressBees shipment booking), replacing manual order processing (saving 6 hours/day).
- **Logistics platform –** Built the company's domestic and international logistics service on courier partner APIs, covering order intake, shipment booking and live tracking for 5K+ shipments/month, plus the admin panel the operations team uses to manage and process orders.
- **E-commerce storefront & warehouse admin –** Developed the storefront and its admin panel for region-wise stock and inventory management across US and UAE warehouses(1M+ SKUs); integrated Razorpay payments.
- **API gateway –** Designed the gateway that routes storefront orders into the CRM and handles data exchange between internal systems and third-party services.
- **Database design –** Designed the PostgreSQL schema for orders, customers, inventory and shipments, and wrote the SQL behind the order, inventory and shipment workflows.
- **Websites & SEO –** Built and deployed the company's logistics, courier and business websites; manage production hosting and work on SEO, page indexing and load performance.
- **Team leadership –** Plan and assign tasks for a team of 5 developers, review code and support other developers, working closely with the product and operations teams.

React Native Developer — ACE International *Jan 2024 – Jul 2025*

- **Linky Pro app –** Built Visitor registry, Tap to pay, Social Media, Function Booking in the Linky Pro React Native app, integrated it with backend APIs to load and display user data, and worked on the server side of those integrations.
- **Web portal sync –** Connected the app with the Linky Pro web portal so user data stays in sync across mobile and web; contributed to user data management on the company website.
- **Performance –** Cut app load time and improved responsiveness by reworking how the app fetched and handled data (API response caching, Pagination / lazy loading, Removing duplicate API calls, FlatList optimization).

Software Developer — Fxgetactive *Oct 2022 – Dec 2023*

- **Fitness apps (TinyBitsApp, ActiveKids, TinyBits) –** Developed React Native fitness apps for clients including AT&T and SportzVillage : ML Kit posture detection for workout tracking, Strava and Google Fit integrations, and a refactor of a monolithic codebase into maintainable modules.
- **Backend & web –** Built and reworked backend services in Nest.js, MySQL and C# for the Fitz projects and ; built the FitzActive website; implemented leaderboards, player streams, authentication and authorization with PlayFab.
- **Kiosk game –** Improved microcontroller software for a kiosk game demoed at the Renewable Energy Expo, Delhi.

EDUCATION

Full Stack Development (Certified) — Newton School | Oct 2021 – Aug 2022
B.Com — Jai Bharat College, Mumbai University | 2019 - 2021 | CGPA: 7.0
